Pesticide General Notice

A Minnesota state law went into effect in year 2000 that requires schools to inform school staff, students and parents if they apply certain pesticides on school property.

Specifically, this law requires schools that apply these pesticides to maintain an estimated schedule of pesticide applications and to make the schedule available to employees and parents for review or copying at the school office.

State law also requires that you be told that the long-term health effects on children from the application of such pesticides or the class of chemicals to which they belong may not be fully understood.

If there are any questions regarding the District's Integrated Pest Management program or you would like more information on the pesticide application schedule, please feel free to call the school at (218) 945-6983 .

Indoor Air Quality Notice

Fertile-Beltrami School District is proud to be taking a leadership role in providing a safe, comfortable and productive environment for our students and staff so that we achieve our core mission—educating students. Our school will follow the EPA guidance to improve our indoor air quality by preventing as many IAQ problems as possible, and by quickly responding to any IAQ problems that may arise. Good air quality requires an ongoing commitment by everyone in our school, because each of us daily makes decisions and performs activities that affect the quality of the air we breathe.

School staff, students and parents can obtain checklists or self-help information so they can properly evaluate their child's home or other out of school situation by contacting the school. Staff and parents can also obtain information about school facility construction, maintenance and housekeeping practices, chemicals used, mold and HVAC related information, chemical producing academic subjects, and pesticide and herbicide applications to determine the extent to which school activities contribute to a child's symptoms by contacting the school.

The Fertile-Beltrami School District Indoor Air Quality contact person is Head of Buildings & Grounds. If there are any questions regarding the school's IAQ Program, please feel free to call the school at (218) 945-6983.
